Prof Thys van der Molen is Professor of Primary Care Respiratory Medicine at The University Medical Centre Groningen in Groningen, The Netherlands, and is Member of the Board at the Groningen Research Institute of Asthma and COPD (GRIAC).

His main research interests include: respiratory diseases (asthma and COPD) in primary care, integrated care, and the development of outcome measures, symptom and diagnostic questionnaires. He developed the Clinical COPD Questionnaire (CCQ), which aims to measure health status in patients with COPD. The CCQ has been translated into 76 languages and was included in the Global Initiative for Chronic Obstructive Lung Disease (GOLD) 2013 update. He was involved in the development of the COPD Assessment Test (CAT). He is the Responsible Investigator for the development of the Inhaled Corticosteroids Questionnaire (ICQ), which aims to measure patient-perceived side effects of inhaled corticosteroids.

Professor van der Molen has published over 250 scientific papers and is also the Founding President of the International Primary Care Respiratory Group (IPCRG), was a member of the GOLD executive Committee between 2002 and 2008.
